

COMPANY DESCRIPTION

FORMYCON is a leading and independent developer of high-quality biopharmaceutical medicines, especially biosimilars. These are follow-on versions of biopharmaceuticals, for which exclusivity has expired. FORMYCON focuses on treatments in ophthalmology, immunology and on other key chronic diseases and currently has four biosimilars in development. Because of their size and structural complexity, and their production using living cell systems, biosimilars require very significant time, effort and expertise, both in their development and in their subsequent production. Based on its extensive experience in the development of biopharmaceutical medicines, FORMYCON is also working on the development of antibody-based COVID-19 compounds.

PIPELINE	Reference Product Active Ingredient Disease Area	Indications	Partner	Preclinical Phase	Clinical Phase I	Clinical Phase III
FYB 201	Lucentis® Ranibizumab Ophthalmology	wAMD, DME, RVO, mCNV, DR*	Bioeq AG	✓	✓	
FYB 202	Stelara® Ustekinumab Immunology	Pso, PsA, CD, UC	Aristo Pharma GmbH	✓		Start Q3/2020
FYB 203	Eylea® Aflibercept Ophthalmology	wAMD, DME, RVO, DR*, mCNV**	Klinge Biopharma GmbH			
FYB 20X						

* FDA approved only ** EMA approved only

STRATEGY & GOALS

FORMYCON is specifically concentrating on the “third wave” of biosimilars, namely follow-on products for blockbuster biopharmaceuticals with patent expiries beginning in the year 2020. The company seeks to license out its biosimilar candidates to cooperation partners once certain defined development milestones have been attained to further develop these through to regulatory approval together with the respective partner company. The FORMYCON Group is currently focusing on research and development activities for both its own and out-licensed biosimilar projects, which are the source of its current revenues. After successful approval of the biosimilar candidates, FORMYCON will also participate in the subsequent marketing revenues. Because FORMYCON has focused its efforts on this generation of biosimilars at a timely stage, the company has been able to carve out for itself a unique and leading position in this market space. It's the strategic goal to further strengthen that status and, as a leading independent developer of biosimilars, to assume a key role in this global market. Biosimilars are the drugs of the future. Through their proven efficacy, cost efficiency and high standard of quality, biosimilar medicines are already making a major contribution towards enabling patient access to effective medical treatments. Through its biosimilars, FORMYCON will help not only patients around the world but also contributes to ease the financial strains on the world's healthcare systems.

FACTS

Founded	2007
