

Formycon AG is one of the world's leading developers of biosimilars. With an experienced team comprised of more than 100 professionals, the company is able to span the entire value chain of biosimilar drug development, from market analysis and protein analytics, to the development of production processes, to clinical trials and the regulatory approval process.

To support our team in Martinsried near Munich, we are looking for suitable candidates for the following fulltime position, initially limited to 1 1/2 years as parental leave cover, to begin work as soon as possible:

Senior Scientist Drug Product Process Development **(m/f/d)**

Your responsibilities:

- Develop robust processes for the manufacturing of biosimilar drug product in syringes and vials; design experiments, ensure appropriate execution and documentation for drug product process development and process characterization in agreement with current Quality by Design principles
- Transfer manufacturing procedures to large-scale GMP facilities, leading process characterization, supporting validation and registration as well as ensuring appropriate documentation and qualifications
- Be present at Drug Product production sites as needed for transfer meetings and production runs
- Comply with the requirements of the Quality Management System (QMS) of Formycon AG
- Compile of high quality scientific documents as needed (e.g. technical documentation package, SOPs, reports, risk assessments, master plans, sampling plans, memos) to hand over to internal and/or external partners (e.g. Quality, regCMC, health authorities, external companies) and support generation of international registration documents (CTD, BB, IMPD, IND etc.).
- Represent DP Process Development in internal and external meetings and conferences
- Establish and coordinate relationships with internal and external partners (CDMOs, CROs, license partners)

Your qualifications:

- Master of Science (or equivalent) and several years of work experience in relevant industry
- PhD and preferably relevant work experience
- Excellent knowledge in drug product development, manufacturing and process transfer
- Excellent knowledge in drug product primary and secondary packaging and/or drug product device development
- Very good team player, result oriented, well organized, proactive, problem solver, able to work independently, strong presentation and communication skills
- Creativity and enthusiasm for working in a dynamic fast growing biopharmaceutical company
- Strong command of spoken and written English
- Very proficient in MS-Office package

Bring us your skills and energy, and shape your own career in a stimulating and open work environment. We are looking for highly motivated individuals who are ready to take on new challenges with enthusiasm and personal commitment. Working at Formycon means being part of a smart, innovative team with minimal hierarchy and opportunity to share your own ideas.

Have we sparked your interest? Then we look forward to receiving your application for employment through our online application portal. Please be sure to include all supporting documents, along with your earliest possible starting date and your salary expectations. We look forward to learning about you and the qualifications, which you would bring to this position.
