

Formycon AG is one of the world's leading developers of biosimilars. With an experienced team comprised of more than 95 professionals, the company is able to span the entire value chain of biosimilar drug development, from market analysis and protein analytics, to the development of production processes, to clinical trials and the regulatory approval process.

To support our team in Martinsried near Munich, we are looking for suitable candidates for the following fulltime permanent position, to begin work as soon as possible:

Scientist Drug Product Laboratory (m/f/d)

Your responsibilities:

- Develop robust formulations and select appropriate primary packaging components for biosimilar drug products
- Design and perform lab experiments, ensure appropriate documentation (preparation of plans, protocols, reports) for drug product formulation, process development as well as process characterization, in collaboration with the Formulation and Process Development colleagues and in agreement with current Quality by Design principles
- Produce high quality documentation and presentations of performed studies and present them to internal and external partners, as well at external conference when applicable
- Plan, develop and execute drug product specific analytical methods, such as compendial methods, particle characterization methods, qualitative and quantitative excipient methods, as well as packaging testing methods when applicable, including documentation
- Support or perform directly the qualification/validation of the above methods (in house or at external testing labs) and be author of related documentation, as needed
- Support the preparation and review of patent applications related to formulation and primary packaging studies
- Take over responsibility for one or more analytical testing equipment, including performing of qualification and maintenance according to high quality standards

Your qualifications:

- Master of Science, Dipl. Ing. Biochemistry, Biotechnology, Pharmaceutical Sciences plus 1-3 years of relevant work experience or PhD in Biotechnology, Chemistry, Biochemistry, Pharmaceutical Sciences or similar qualification
- At least, intermediate knowledge in protein chemistry and analytics
- Creativity and enthusiasm for working in a dynamic fast growing biopharmaceutical company
- Independent, careful and structured way of working
- Very good command of spoken and written English
- Very proficient in MS-Office package
- Excellent in team working

Bring us your skills and energy and shape your own career in a stimulating and open work environment. We are looking for highly motivated individuals who are ready to take on new challenges with enthusiasm and personal commitment. Working at Formycon means being part of a smart, innovative team with minimal hierarchy and opportunity to share your own ideas.

Have we sparked your interest? Then we look forward to receiving your application for employment through our online application portal. Please be sure to include all supporting documents, along with your earliest possible starting date and your salary expectations. We look forward to learning about you and the qualifications which you would bring to this position.
